EXHIBITIONS

## ABOUT THE EXHIBITION

Living Dinosaurs is a comprehensive educational exhibition that takes visitors on an immersive journey to the past. Each dinosaur features life-like movements, colors, textures and sounds, delivering unique “real life” encounters with these massive creatures.

Our team of scientific experts designed the layout of Living Dinosaurs with careful consideration of even the smallest factual details. Illustrated displays and information panels guide visitors of all ages.

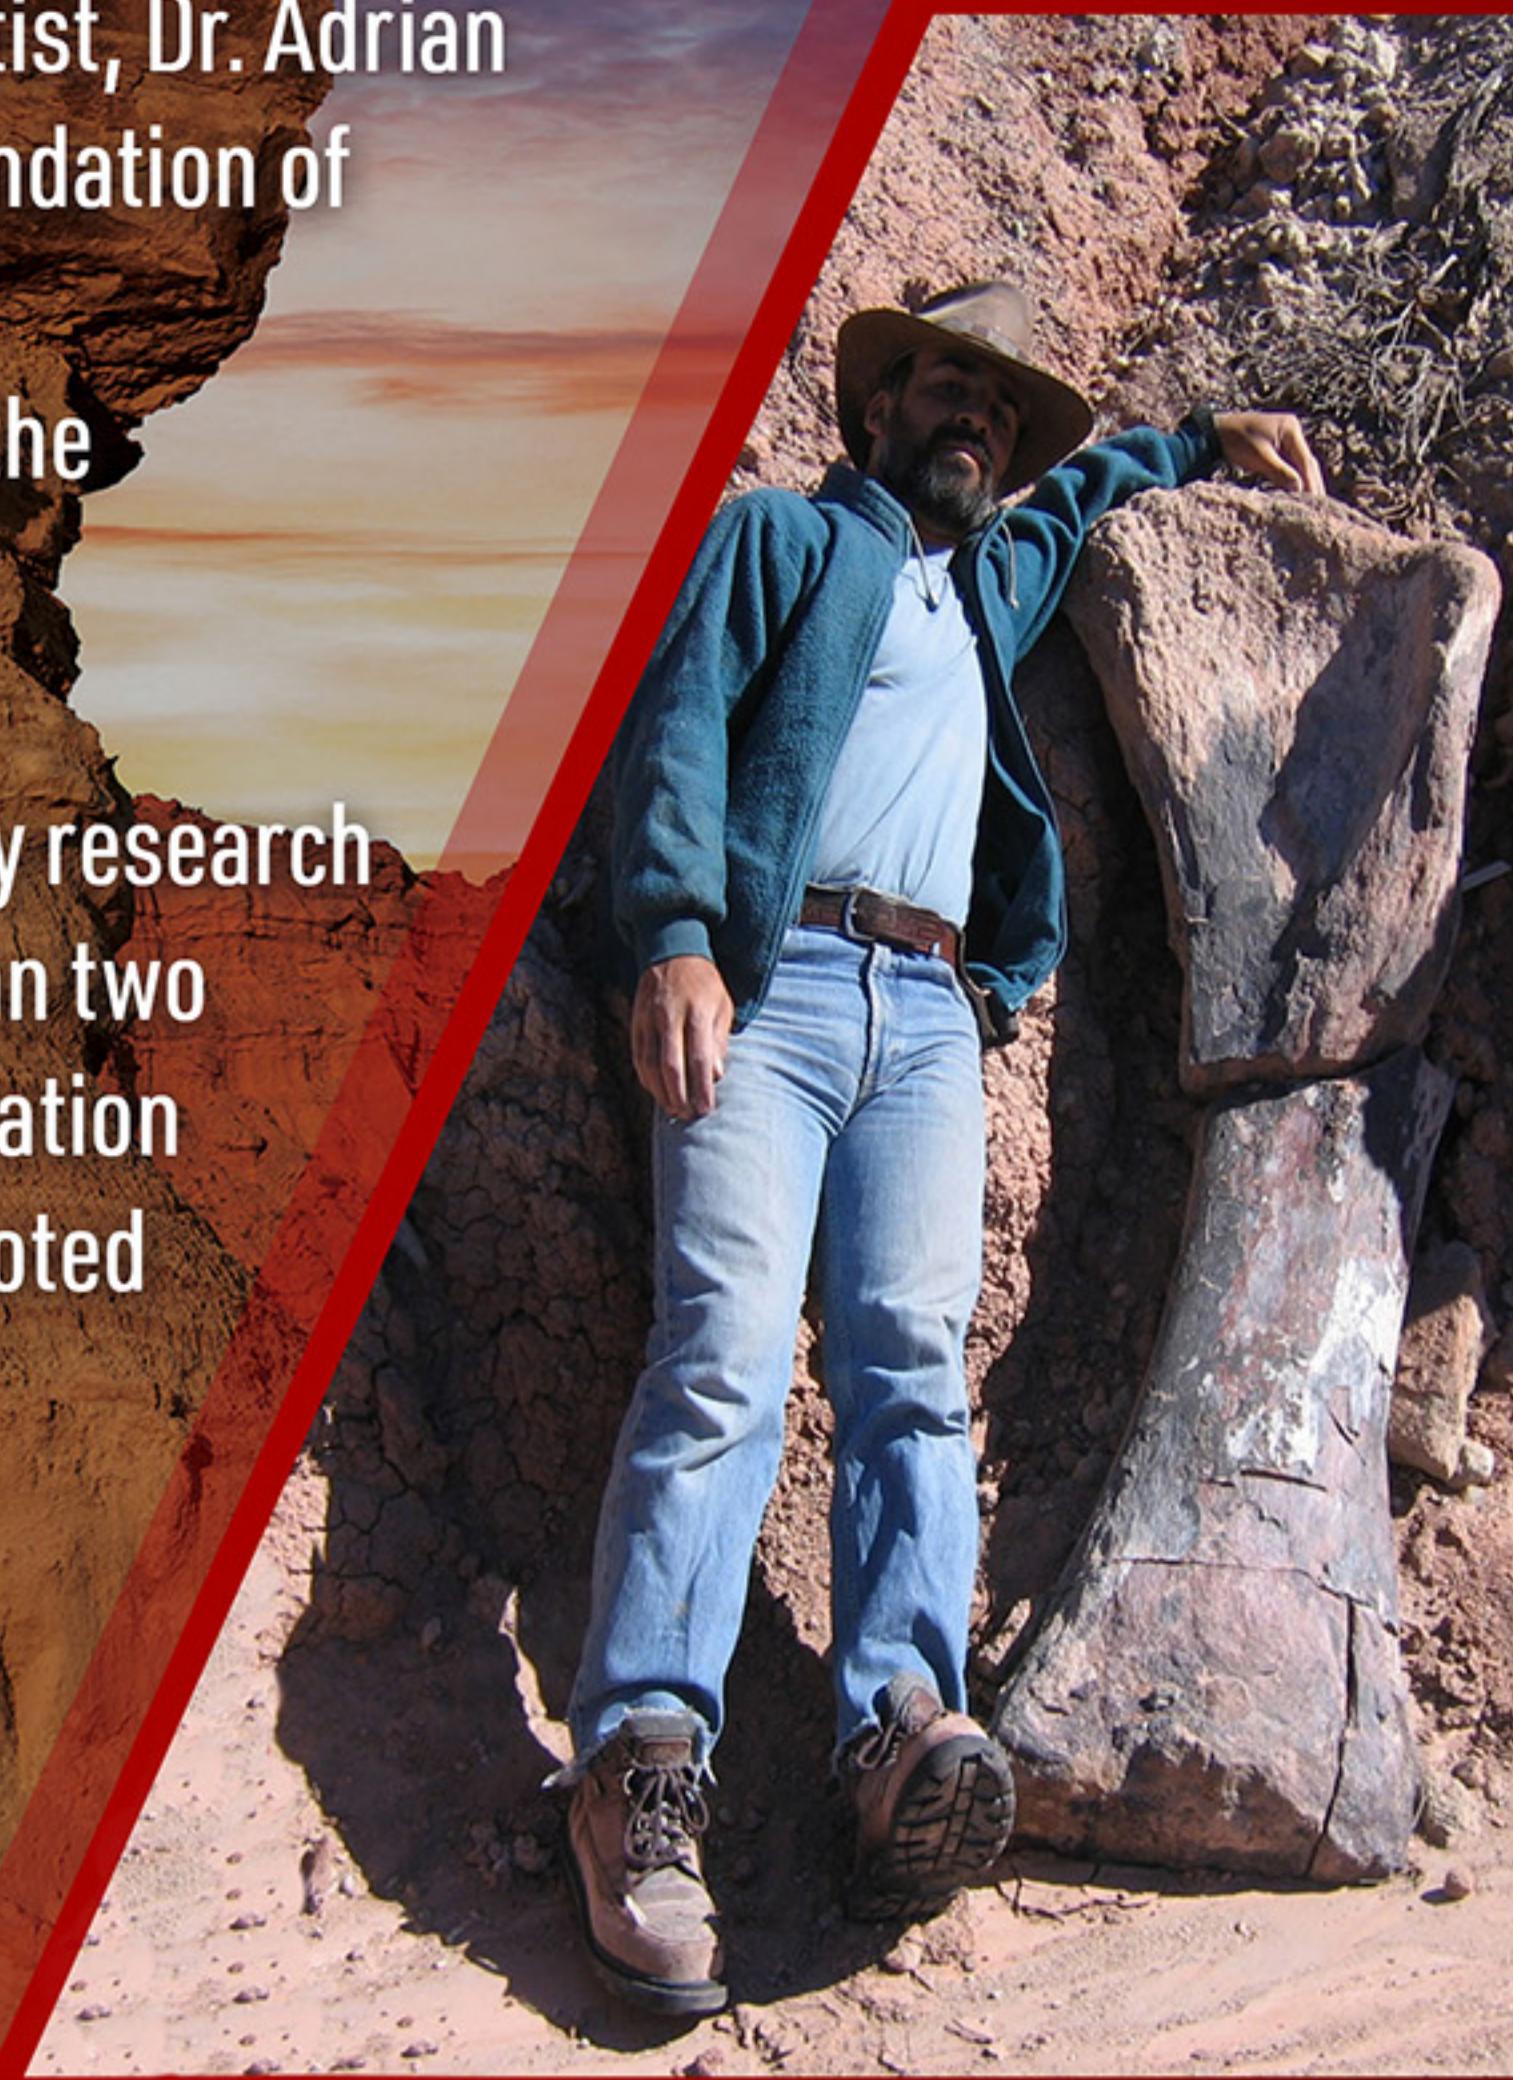

## CURATORS & ADVISORS

Living Dinosaurs is curated by Argentinian paleontologist and natural scientist, Dr. Adrian Giacchino, Director of the Félix de Azara Foundation. The Félix de Azara Foundation of Natural History is a non-governmental, non-profit organization with the aim of contributing to the conservation of nature and cultural heritage, the development of science, and the sustainable use of natural resources.

Since it was founded in 2000, the Foundation has contributed more than fifty research and conservation projects, participated as an editor or sponsor for more than two hundred books and documentaries on science and nature, promoted the creation of nature reserves, worked in the rescue and management of wildlife, promoted research and dissemination of science information for private universities, assisted in the preparation of various environmental laws, organized conferences, courses and nearly one hundred lectures.

Within a decade of its conception, the Foundation became synonymous with prestige, quality and excellence as a landmark institution for the development and dissemination of science and conservation of natural and cultural resources in Argentina.

# TOPICS

We invite you to explore a world ruled by dinosaurs for 180 million years.

Come face-to-face with incredible skeletons, terrifying predators, vicious carnivores and peaceful herbivores.

Learn interesting information about these creatures, for example, how the Maiasaura or the "good mother dinosaur" carefully built nests and raised its offsprings.

Living Dinosaurs provides a unique view of these prehistoric creatures' lives until their extinction 65 million years ago.

This incredible, interactive exhibition is exciting, engaging and educational for visitors of all ages.
